

CLAD-LINE CL4 Framing System

Description:

CL4 is CLAD-LINE's non-combustible alternative to timber battens, comprising of Top-Hat and Zed profiles which can be fixed directly back to the main structure. The CL4 system has been designed with oversized flanges to make fixing easier.

Suitable for rainscreens with a shallow cladding zone (25mm or 40mm), this system can be used with a wide range of face fixed cladding panels.

Features and Benefits:

- Lightweight
- Durable
- Cost Effective
- Cavity range from 25mm to 40mm

Applications:

For panel systems using face fixings or discrete mechanical fixings.

Product Guidance – As Standard:

Material:

Aluminium

Options:
